School level entrance exams. These Geometry Practice Test with Answers materials, students will become familiar with the types of items and response formats [...]

Geometry Practice Test 2

First, add the two straight 150 yard portions. Also, note that the distance around the two semi-circle turns combine to form the circumference of a circle. The radius (r) of that circle is half of the dimension shown as the width of the track, or 15 yards. Now, taking the formula for the circumference of a circle, $2\pi r$ (with $r = 15$), and adding ...
